

It's always spring

The Flower line of Medac containers brings a breath of fresh air into the pastry shop in all seasons. Planned down to the last detail, it is a jewel of design and creativity: just think that it won the Comunicando prize in the Unica category in 2012. When closed, Flowers containers look like beautiful blossoms, safeguarding their contents carefully. When opened, their petals spread and they become truly beautiful flower by magic. Ideal for sweet and salty specialties, they are suitable for contact with frozen and chilled food at room and hot temperature (up to 70°C for one hour). They can also contain candies and chocolates, becoming an elegant gift box. The range is available in two volumes, 200 and 570 ml, and in six coloured versions (pink, red,

yellow, rose, sky, face) as well as neutral white. The containers can be personalized in your chosen design as well.

Continuing the production philosophy that distinguishes Medac's products, Flower containers have a low environmental impact. In fact, they are realized with cardboard from virgin cellulose pulp, a material that can be regenerated to obtain recyclable paper for packaging.
