

EVEN MORE COMPLETE

New WP1000 container is the ideal complement to Medac's product line, which today features an ample selection of gelato and drinking cups in many different sizes. Products are also offered for various occasions and uses: chips paper cups, coffee and hot drinking line, yogurt cups, gelato cups carrier, paper cone sleeves, crepe paper box, popcorn containers, food containers, hot paper save wrappers and lids.

Medac has expanded its line of gelato cups with the new WP1000 container, to meet emerging market demands with skill and professionalism. The cup's capacity is approximately 1.176 ml and it's also available with a cardboard lid (model CB1000). Special attention is paid to the client's aesthetic requirements. The lid's ring is available in a big range of colours (black, blue, white, cream and gold). Both cups and lids can be customised with a little minimum quantity.

IT'S ALWAYS SPRING

"Flower" containers are one of the more advanced Medac design successes. In fact they actually undergo a real metamorphosis: they appear as fresh flower buds when they are closed, and when they're opened, they unfold their petals and become a colourful flower. Flower is ready to hold any type of food for take-away, from sweet pastries to savoury foods, and including hot or cold gourmet specialities. It's also an unusual container for candies or pralines or for various objects, like scarves, necklaces and bracelets.

In keeping with the eco-friendly designs Medac has featured for years now, Flower is made of cardboard from virgin cellulose pulp, a material that can be regenerated to make an excellent packaging paper to be recycled with a low environmental impact.
