

**MID Certification  
(Directive 2014/32/EU)**

The European Directive 2014/32/EU MID (Measurement Instrument Directive) of February 26 2014 regulates the conformity of drinking cups as measuring instruments, and in particular, the precision of the " line measure marking " printed to indicate the volume of the drink contained.

It is mandatory to print this line to ensure the expected capacity only if the drinking paper cups are used as a measuring instrument, selling the drinks by volume.

By the MID certification, obtained by Medac's Quality System approval from the CE Notified Body n.2142, the capacity of the measuring instruments produced by Medac (cold / hot drinking paper cups) is guaranteed.

In accordance with the requirements, it is mandatory to:

1. insert the capacity and the CE marking with the certification number and the year of production inside a box;
2. always print Medac name or logo on the bottom of the cups as it is the only responsible for the exact measurement of the capacity.
