PEFC™ Certification
(PEFC™ ST 1002)

PEFC™ (Program for Endorsement of Forest Certification) is an international organization created by the owners of forestall areas meant to promote a sustainable management of woodlands and forestall patrimony.

The PEFC forest management certification has been issued by the SGS certification body in accordance with the PEFC ST 1002 standard for chain of custody certification. The system is designed to ensure that the paper comes from forests that are managed correctly and responsibly according to rigorous environmental, social and economic standards.

All Medac's products carrying the PEFC logo, after the Certification Body authorization, are certified.
