

**Environmental Policy
(UNI EN ISO 14001:2015)**

The General Management has adopted an environmental management system in accordance with the international standard UNI EN ISO 14001, committing to:

- implement the environmental management system in line with the requirements defined by ISO 14001
- identify interested parties and determine their needs and expectations, which have been translated into internal compliance obligations
- comply with all applicable legal requirements and other environmental commitments undertaken
- pursue continual improvement and pollution prevention
- reduce environmental impacts through:
 - control of energy consumption
 - reduction of atmospheric emissions
 - optimization of the use of natural resources
 - life cycle analysis of products
- contribute to climate change mitigation by reducing greenhouse gas emissions, optimizing the use of energy from non-renewable sources, and promoting the use of renewable energy
- promote the use of materials and solutions with a lower environmental impact
- improve the responsible management of natural resources, such as water, by implementing actions aimed at reducing consumption
- contribute to improving the collection and recycling of its products at end of life
- reduce the risk of negative environmental impacts within the supply chain and select suppliers that adopt best environmental practices
- keep personnel updated on best practices in line with expected outcomes
- define clear, measurable environmental objectives and targets
