

**Aticelca Policy
(Aticelca 501/2019 Method)**

The General Management is committed to:

- manufacture recyclable products in accordance with the Waste Packaging Directive, the ATICELCA 501/2019 method, and the UNI EN 13430 standard;
- encourage eco-design and the recyclability of cellulose-based products placed in separate collection streams;
- enable the supply chain to increase paper recycling capacity by paper mills and to enhance the use of waste in support of environmental protection and energy efficiency;
- promote industrial research and development of new processes and products needed to replace those with a high environmental impact.
